

## OVABLEND® REC N65 R30

PC/ABS compound, non reinforced grade, with post-industrial raw material N65: medium heat grade.

**R30**: with at least 30% of post-industrial polymeric raw material. In compliance with ISO 14021:2016, self-declaration validated by TÜV NORD, certificate number IT-25519/2024.

**Color**: available in black and in other colors on demand.

For injection molding of automotive and industrial parts, housings and small appliances articles.

| RECOMMENDED PROCESSING PARAMETERS FOR INJECTION MOLDING |                                  |                   |  |  |  |
|---|----------------------------------|-------------------|--|--|--|
| DRYING CONDITIONS                                       | BARREL TEMPERATURE               | MOULD TEMPERATURE |  |  |  |
| $100 ^{\circ}\text{C} \times 3 \div 4 \text{ hours}$    | 240 ÷ 270 °C                     | 70 ÷ 90 °C        |  |  |  |
| Maximum moisture content after drying $\leq 0.02\%$     | Standard melt temperature: 260°C |                   |  |  |  |
| PACKAGING   |                                  |                   |  |  |  |
| 25 Kg Bags, 1000 Kg Octabins, 750 Kg Boxes              |                                  |                   |  |  |  |

| PROPERTIES  | METHOD          |              | UNIT               | TYPICAL        |
|---|-----------------|--------------|--------------------|----------------|
| DHVCICAL  |                 |              |                    | VALUES         |
| PHYSICAL  | 4 CER 4 D 702   | VIC 1102     | , 3                | 1 12           |
| Density   | ASTM D792       | ISO 1183     | gr/cm <sup>3</sup> | 1.13           |

Our technical data are provided for guidance purpose only and are based on average values. The data are not meant to be used for specification or warranted purposes. Values may be affected by the design of the mold/die, the processing conditions and coloring/pigmentation of the product. Unless specified to the contrary, the data have been established on standardized test specimens at room temperature. All technical information is subject to continuous update, so the customer shall always ensure that the latest release of technical information is at his own disposal. It is the customer's responsibility to inspect and test our products in order to determine to his own satisfaction whether they are suitable for his intended uses and applications or used in conjunction with third-party materials. Unless specifically stated with reference to the specific color code, the products mentioned herein are not suitable for applications in the pharmaceutical, medical, dental and toys sectors, in contact with foodstuff or for potable water transportation.
